

Aerospace Precision Windings Medical Coils

*Developing internal medical navigation and
probe coils for the human body*

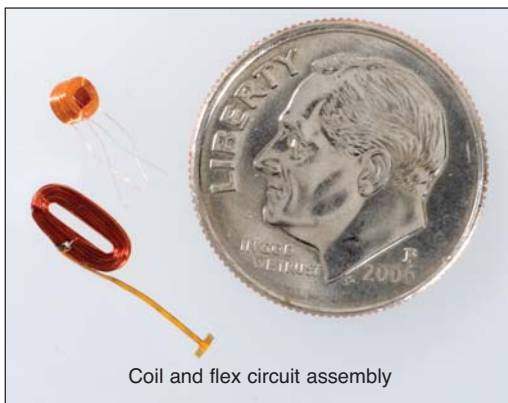

58 gauge: 0.0004" (.0099mm)
Coil O.D.: 0.0125" (.3175mm)

- Experts in medical winding requirements
- Wire sizes to 58 gauge .00039"(.0099mm)
- Programmable winding machines used under microscope
- Fine wire soldering capabilities, to 58 gauge
- Medium to small lot production technology
- Exotic materials: tungsten and platinum

MEDICAL FINE WIRE APPLICATIONS

- Sensors
- LV Leads for Catheters
- Cardiac Mapping Coils
- Navigation Coils
- Proximal Coils
- Heater Coils
- Surgical Coils
- Radio Frequency Coils
- Exotic materials:
tungsten and platinum

QUALITY AND PERFORMANCE

- ISO 9002/2000
- Numerous awards for quality and on-time delivery
- NASA certification
- Certified as a Dock-to-Stock Kanban supplier
- Computer-aided LCD vision metrology inspection procedures
- Fast turnaround prototype shop
- More than 40 years of coil winding experience

Precision winding techniques performed with the aid of a microscope.

AEROSPACE PRECISION WINDINGS a division of Classic Coil Company

Your source for difficult, complex coils.
